

Week3-Day2-Home Assignment-Populating user stories from Jira

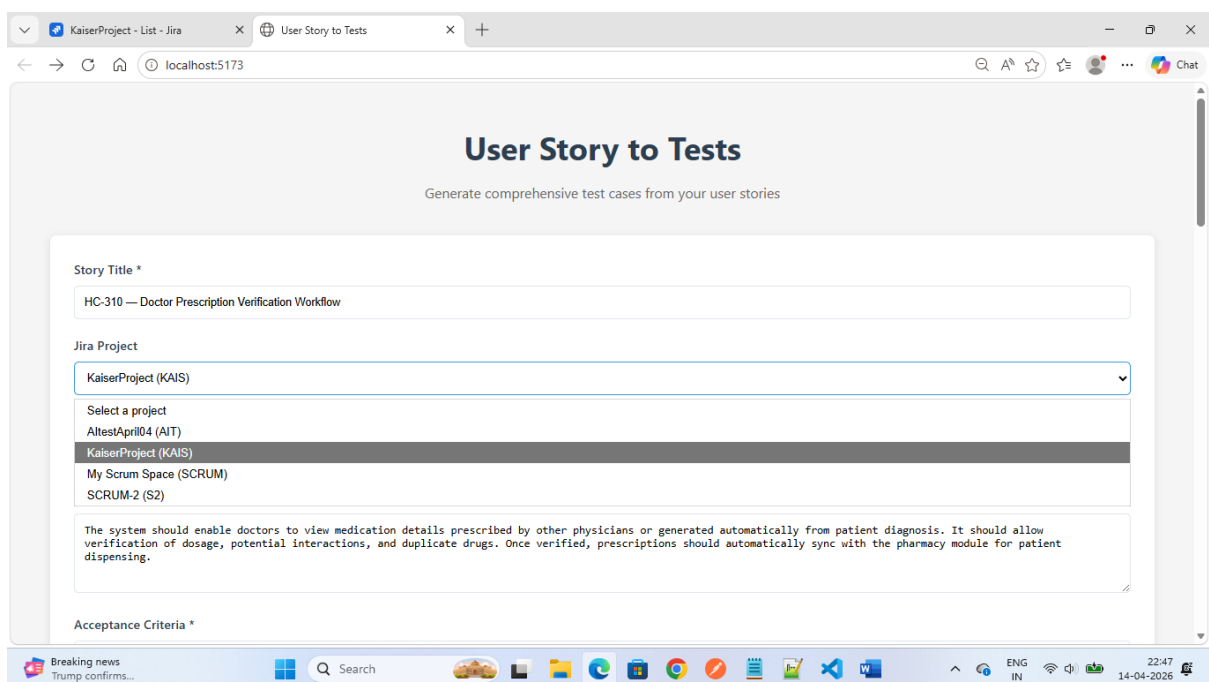

Updated UI

Select Jira Project and Jira user story

The screenshot shows the Jira web interface for the 'KaiserProject'. The left sidebar contains navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', and 'Recent'. The main area displays a list of user stories under the 'KaiserProject' space. The table below represents the data shown in the screenshot:

Work	Assignee	Reporter	Priority	Status
☐ KAIS-1 Doctor has access to patient record with pend...	SR Sathyabama Rajagopal	SR Sathyabama Raj...	P4	IN PROG
☐ KAIS-5 Valid prescription available for approval	SR Sathyabama Rajagopal	SR Sathyabama Raj...	High	DONE
☐ KAIS-2 Prescription exists with incorrect dosage	Unassigned	SR Sathyabama Raj...	Medium	TO DO
☐ KAIS-3 Prescription contains duplicate drugs	Unassigned	SR Sathyabama Raj...	P1	TO DO
☐ KAIS-4 Prescription has errors	Unassigned	SR Sathyabama Raj...	P2	IN PROG

The screenshot shows the 'User Story to Tests' application interface. It features a form for generating test cases from user stories. The form includes the following fields and content:

- Story Title ***: HC-310 — Doctor Prescription Verification Workflow
- Jira Project**: KaiserProject (KAIS)
- Select a project**: A dropdown menu showing 'AltestApril04 (AIT)', 'KaiserProject (KAIS)' (selected), and 'My Scrum Space (SCRUM)'. Below it, 'SCRUM-2 (S2)' is listed.
- User Story Text**: The system should enable doctors to view medication details prescribed by other physicians or generated automatically from patient diagnosis. It should allow verification of dosage, potential interactions, and duplicate drugs. Once verified, prescriptions should automatically sync with the pharmacy module for patient dispensing.
- Acceptance Criteria ***: (Empty field)

HC-310 — Doctor Prescription Verification Workflow

Jira Project

KaiserProject (KAIS)

Jira User Story

KAIS-1 -

Description

The system should enable doctors to view medication details prescribed by other physicians or generated automatically from patient diagnosis. It should allow verification of dosage, potential interactions, and duplicate drugs. Once verified, prescriptions should automatically sync with the pharmacy module for patient dispensing.

Acceptance Criteria *

Given a doctor with access to a patient record,
When they open the prescription module,
Then all pending prescriptions should be displayed for verification.
